

About the Rajiv Gandhi School of IP Law (RGSolPL)

Rajiv Gandhi School of Intellectual Property Law, Indian Institute of Technology Kharagpur organised a series of webinar on broad themes of law. The purpose of the webinar was to enhance the knowledge base of undergraduate students, post-graduate students and research scholars of the School. Twelve leading legal luminaries engaged in academic discourse with the students and the scholars of the law school.

TWO DAYS WORKSHOP ON LEGAL & REGULATORY CHALLENGES RELATED TO PHARMACEUTICAL INDUSTRY

Objective of the Workshop

The pharmaceutical industry is a dynamic, research-intensive sector that is fundamentally influenced by a web of legislation and regulations designed to promote research and innovation; regulate and approve drug production; protect consumers from potentially harmful effects of drugs, and control public and private expenditure on drugs. Commencing with drug development to marketing and even during the post-marketing phase, the drug industry has to comply with certain regulations. Considering the prevalent practices in the pharmaceutical sector, the workshop aims to highlight and review the policy impact of two crucial aspects- first, the regulatory laws for vaccine and drug development. Second, the pre and post-marketing regulations with respect to approval.

This interdisciplinary workshop is an amalgamation of legal and regulatory challenges related to pharmaceuticals that will reflect the divergent viewpoints of the regulators and industry representatives. It will provide a venue to review challenges related to clinical trials, approval and marketing of vaccines and pharmaceuticals.

*The workshop is designed to be interactive and will open an opportunity for discussion between researchers, medical practitioners, pharmaceutical associations, students, and legal counselors, and likewise to bring out the critical gaps and possible solutions to the current legal and regulatory obstacles in relation to drugs and vaccines, more so during the time of pandemic like COVID-19. The workshop will be held on **September 3-4, 2022.***

Registration Fees:

Industry Professionals - Rs. 2000 /-

Faculties - Rs. 1500 /-

Students (B. Pharma, B.Sc., B.Sc. LL.B., B.Tech. LLB, LL.M, M.Sc, M.Pharma, MBBS and PhD in allied disciplines) - Rs. 500 /-

International Participants - 50 USD

Mode:

Online / Hybrid

Registration Timeline:

10 June- 31 August 2022.
