

About IIT Kharagpur

Kharagpur - a dusty town tucked away in the eastern corner of India, famous until 1950 as home to the longest railway platform in the world - became the nursery where the seed of the IIT system was planted in 1951. IIT Kharagpur started its journey in the old Hijli Detention Camp in Eastern India, where some of the country's great freedom fighters toiled and sacrificed their lives for India's independence. Spurred by the success of IIT Kharagpur, four younger IITs sprouted around the country in the two following decades, and from these five came thousands of IITians, the brand ambassadors of modern India. It was the success of this one institution at Kharagpur that wrote India's technological odyssey.

The Institute takes pride in its relentless effort to provide the best platform for both education as well as research in the areas of science and technology, infrastructure, designs, entrepreneurship, law, management, and medical science and technology. IITKGP is not just the place to study technology, it is the place where students are taught to dream about the future of technology and beam across disciplines, making differences enough to change the world.

About SCONLI- 14

The Students' Conference of Linguistics in India (SCONLI) is a two-day international conference organized annually by research scholars of linguistics in India. It started in 2006 with its first meet at CIEFL, Hyderabad (now EFL University), followed by Delhi University and Jawaharlal Nehru University, New Delhi.

Since then it has been hosted by different universities and institutes. The conference has completed 13 successful years. The SCONLI 13 was hosted by IIT (ISM) Dhanbad in 2019. SCONLI has proved to be quite beneficial over the years for the students of linguistics. It is different from the other conferences as it is managed thoroughly by the students and the research scholars, which gives them the opportunity to learn diverse aspects of the academic world. It has served as a scholarly platform for young linguists to engage in diverse activities ranging from writing to reviewing papers to chairing the conference sessions and inviting experts of their choice for the talks.

SCONLI is not confined to core linguistics like many other conferences of linguistics. The field of linguistics is highly multidisciplinary and that is well represented in SCONLI, where we see quality research papers from different sub disciplines of linguistics like forensic linguistics, computational linguistics, anthropological linguistics, language documentation, media linguistics, etc. SCONLI also has a tradition of publishing the selected papers in its proceedings or as book chapters. Some of the linguists who are working today as faculties in different reputed universities or institutes, had their first published papers in the SCONLI proceedings.
