PLATINUM JUBILEE CONFERENCE

CALL FOR ABSTRACTS

The Science of Happiness and Well-being:

Interdisciplinary Pathways to Sustainable and Inclusive Futures

- Interdisciplinary Perspectives
- Evidence-Based Insights
- Inclusive & Sustainable Futures

Together, let's build a healthier, happier and more sustainable world

Bridging Disciplines Enhancing Well-being Shaping Sustainable Futures

Happiness and well-being are increasingly understood as multidimensional, extending beyond income and physical health to encompass psychological, educational, occupational, socio-economic, environmental, cultural, spiritual, and technological dimensions across the life course. This broader perspective is shaped by emerging challenges such as mental health concerns, educational and workplace stress, new modes of work, climate change, socio-economic inequalities, and the growing influence of digital technologies and Artificial Intelligence. Addressing this complexity requires a holistic and interdisciplinary approach that bridges scientific, social, cultural, environmental, and technological perspectives. Such an approach can help advance inclusive, adaptive, and sustainable policies and practices that promote happiness and well-being for individuals, communities, and society as a whole.

In addition to paper presentations, the conference will feature keynote addresses and engaging panel discussions with distinguished experts from academia and industry.

CONFERENCE DATES

4-5th January, 2027

IIT Kharagpur Research Park, Kolkata, India

KEY DATES

Abstract Submission Opens	07 September 2026	**Full Paper Submission**	30 November 2026
