

Responsible Research and Innovation in India's Energy-Water-Food-Health Nexus – online workshop

The IIT Kharagpur in collaboration with the University of Edinburgh planning to organize a one-week online workshop from **27th May – 31st May 2024**.

“RESPONSIBLE RESEARCH AND INNOVATION IN INDIA’S ENERGY-WATER-FOOD-HEALTH NEXUS”

- *Activities:* Lectures, group discussions, poster tasks, group research project.
- *Participants:* PhD scholars from both The University of Edinburgh, IIT Kharagpur, and other higher academic/research institutes who are interested in facilitating the project work are encouraged to apply. The course is also open to all post-graduate students with an interest in the topic.
- *How to apply:* Please complete the online application form – <https://erp.iitkgp.ac.in/CEP/courses.htm> by **Friday 17th May 2024**.

If the students have a passion to learn about and contribute to sustainable development in an international context, then this week-long summer programme will give a unique opportunity to explore some key challenges from the Indian perspectives. Water, energy, food, and health are all critical to human and planetary sustainability, and each of these intersects with the other three in finding solutions to current problems. The workshop will comprise around 20 research scholars and 20 PG students engaged in lectures, discussions, and problem-solving activities based on real-world examples from both urban and rural India. Students from all disciplines are welcome to apply. The workshop will be held online and will run from approximately 02:00 PM – 18:30 PM (IST) or 09:30 AM – 02:00 PM (BST) from **27th May (Monday) – 31st May (Friday) 2024**.
