

DEADLINES

Key Dates (in 2026)

Timeline for authors and delegates.

31 AUG Abstract submission

15 SEP Acceptance notification

15 NOV Registration deadline

30 NOV Full paper submission

Join us during

02-04 February 2027

IIT Kharagpur, India

REGISTRATION

Registration Fees

| Category | Early | Late |
|------------------------------|------------|------------|
| Govt./Educational institutes | Rs. 7,500 | Rs. 9,000 |
| Industry delegates | Rs. 10,000 | Rs. 12,000 |
| SAARC country delegates | US\$ 250 | US\$ 300 |
| Other international | US\$ 500 | US\$ 600 |
| Students - India | Rs. 2,500 | Rs. 3,000 |
| Students - SAARC | US\$ 150 | US\$ 200 |
| Students - other countries | US\$ 350 | US\$ 400 |

Fees for accompanying spouse is **INR 3,000** for Indian delegates and **USD 150** for international delegates

The Early Bird Registration Fee is valid until **15 November 2026**. Subsequently, the Late Registration Fee applies.

Celebrating 75 years of excellence...

Platinum Jubilee International Conference

Next-Generation Precision Agriculture for Climate-Resilient Water-Energy-Food Systems

Agri-WEF 2027

02-04 February 2027

Agricultural and Food Engineering Department
Indian Institute of Technology Kharagpur

Institute and Department

IIT Kharagpur, established in 1951, is India's first IIT and an Institute of National Importance. As it celebrates its 75 years of excellence, marking its Platinum Jubilee, it carries a distinctive legacy of education, research, innovation, and nation-building.

The Agricultural and Food Engineering Department began as Agricultural Engineering in 1952 and was renamed in 1994. Unique within the IIT system, it spans Farm machinery and power, Land and Water resources, Food Processing, Aquacultural Engineering, Agricultural Systems & Management and Agricultural Biotechnology.

About the Conference

The International Conference on Next-Generation Precision Agriculture for Climate-Resilient Water-Energy-Food Systems, organised under the auspices of the Platinum Jubilee Celebrations of IIT Kharagpur, aims to bring together leading researchers, academicians, industry experts, and policymakers to discuss innovative technologies and sustainable solutions in precision agriculture, smart farming, climate resilience, agribusiness, and intelligent agri-food systems for a sustainable future.

THEMES

The conference focuses on next-generation technologies and integrated management principles across agricultural and food engineering.

- 01 **Integrated Water Intelligence for Climate-Resilient Agriculture and Multi-Hazard Management**
- 02 **Smart and Sustainable Farm Machinery Systems**
- 03 **Smart Food Processing & Post-Harvest Systems**
- 04 **Climate-resilient aquaculture systems**
- 05 **Sustainable Agricultural Production**
- 06 **Biotechnological Interventions in Agriculture, Horticulture, and Microbial Research**
- 07 **Agribusiness for Sustainability: Policy, Technology, and Market Systems**
