BIOTSAV

National Level Fest
November 1-3

Presented By

BioEnGene

Engaging Genes for Innovation & Entrepreneurship

Department of Biotechnology

ABOUT BIOTSAV

The indomitable passion and quest, for the unexplored and the sublime, is the very essence of humanity. Here at “Biotsav”, we celebrate the triumph of new ideas and thoughts, at the same time rejoicing the mysteries of life through the eye-piece of science. Moreover, what better way to do it than to bring both the creative and intuitive together in one great confluence of ideas?

Coming October India will witness its FIRST AND BIGGEST STUDENT BIOENGINEERING FEST, BIOTSAV'19 (for all engineering, medical and science background students who are working in the area of biology-based applications), a fest, rightful to be the torch-bearer in the blossoming avenue of Biotechnology. The motto of Biotsav'19 is the fusion of interdisciplinary fields with biology (Biofusion) for innovation and entrepreneurship. We humbly accept the legacy that IIT KHARAGPUR bequeaths upon us and we vow to form a rich bond with our beloved sponsors who after all are the very pillars upon which this “bastion of the future” stands. We look forward to having a cherished relationship with you, a relationship based on this firm hope that one day our mutual juxtaposition would amount to the flame of Biotechnology glowing with ever-increasing glory of our nation.
