PROGRAMME  
ON  
FRONTIERS OF PUBLIC PRIVATE  
PARTNERSHIP IN  
INFRASTRUCTURE  
DEVELOPMENT  
(FPID 2021)**

**June 10-13, 2021**

**ORGANISED BY  
VINOD GUPTA SCHOOL OF  
MANAGEMENT  
INDIAN INSTITUTE OF  
TECHNOLOGY  
KHARAGPUR, INDIA**

**OBJECTIVE OF THE COURSE**

Infrastructure is considered as the wheel, if not the engine of development. The deficiency of infrastructure will certainly hamper sustainable economic growth. In most of the developing countries including India, the status of infrastructure is low as compared to the need of the respective countries. While the demand for infrastructure is growing at a much faster rate, supply is more or less stagnant. This is mostly due to the rapid urbanization and globalization taking place across the world.

The major hurdle for closing this demand and supply gap is the non-availability of finance for infrastructure creation. Despite the large number of projects that are either in progress or in the pipeline, India is continuously challenged to cope with an increasing demand for infrastructure services. The government has put together an ambitious plan to upgrade and expand infrastructure with special focus on urban infrastructure, particularly transportation, power, water, etc. Within this context the private sector is expected to provide the necessary investment through privatization and Public Private Partnership (PPP) mode. The development of this sector is anticipated

to stimulate economic growth, create jobs, diversify economy and improve the quality of life in the country. Many countries have joined this trend which has been reinforced by the resource crunch faced by the government. Infrastructure projects worth several trillions of dollars are under consideration in many emerging markets with private participation. These projects present unique problems for structuring, risk management, and financing as they are usually characterized by large investment, long gestation periods, and very specific domestic markets.

The objective of this programme is to emphasize broad range of issues & challenges and tools & techniques for PPP mode of infrastructure development. It is predominantly relevant for studying dynamic changes in the economy, particularly with reference, urbanization, globalization, and global competitiveness. The programme will also make an attempt to bring various policy issues including regulation in the current context of PPPs mode of infrastructure development.

## **TOPICS TO BE COVERED**

Module 1: Current issues of infrastructure development

Module 2: Role of Public and Private Sectors in Infrastructure Development

Module 3: Financial and Economic Analysis of PPP Infrastructure Projects

Module 4: Project Valuation of PPP Infrastructure Projects

Module 5: Environmental Assessment of PPP Infrastructure Projects

Module 6: Risk Management in PPP Infrastructure Projects

Module 7: Financial Agreements in PPP Infrastructure Projects

Module 8: Regulatory and Policy Issues in PPP Infrastructure Projects

## **COURSE MATERIALS**

The programme is purely application oriented. Necessary course materials will be provided to the participants during the course.

## **WHO CAN ATTEND?**
