

About IIT Kharagpur

Kharagpur - a dusty town tucked away in the eastern corner of India, famous until 1950 as home to the longest railway platform in the world - became the nursery where the seed of the IIT system was planted in 1951. IIT Kharagpur started its journey in the old Hijli Detention Camp in Eastern India, where some of the country's great freedom fighters toiled and sacrificed their lives for India's independence. Spurred by the success of IIT Kharagpur, four younger IITs sprouted around the country in the two following decades, and from these five came thousands of IITians, the brand ambassadors of modern India. It was the success of this one institution at Kharagpur that wrote India's technological odyssey.

The Institute takes pride in its relentless effort to provide the best platform for both education as well as research in the areas of science and technology, infrastructure designs, entrepreneurship, law, management, and medical science and technology. IITKGP is not just the place to study technology, it is the place where students are taught to dream about the future of technology and beam across disciplines, making differences enough to change the world.

Program Features/ Structure

Classroom lectures – **70%**

Class participation,
discussion-**10%**

Numerical/ Problem solving,
Case study and Activity – **20%**

Program Schedule and Venue

13 – 17 April
2020(9:30 AM – 6 PM)

IIT Kharagpur –
Department of
Mathematics

Program Fee

Nil for TEQIP-III
sponsored participants

**For others - INR
10,000/-** (Ten
thousand) + **GST**
@18% per participant

Who will benefit (Eligibility)

Teachers of TEQIP-III
approved degree level
engineering colleges

Teachers of Non-TEQIP-
III, Research Scholars,
Ph.D, U.G., P.G. students

Last day of Registration

1st

April 2020

Accommodation

Accommodation will be
provided to the TEQIP-
III sponsored
participants at
the campus Guesthouse.
For other participants, the
same will be provided on
chargeable basis as per
rule.

How to Apply

Use the link: <https://erp.iitkgp.ac.in/CEP/courses.htm> to
apply ONLINE.

Payment if applicable is to be done **ONLINE** after getting
short listed for the program.

Cyber Security

13 – 17 April 2020

Introduction / Overview

Internet is among the most important inventions of the 21st century which have affected our life. Today internet have crosses every barrier and have changed the way we use to talk, play games, work, shop, make friends, listen music, see movies, order food, pay bill, greet your friend on his birthday/ anniversary, etc. You name it, and we have an app in place for that. It has facilitated our life by making it comfortable. Gone are the days when we have to stand in a long queue for paying our telephone and electricity bills. Now we can pay it at a click of a button from our home or office. The technology have reached to an extent that we don't even require a computer for using internet. Having mapped out today's current threat landscape, we will then be in a good position in the second instalment of this Security Report to take a closer look under the hood of today's cybercrime world and show how this ecosystem remains a key component of the cyber threat landscape.

Program Objectives

The aim of this course is to introduce the areas of cryptography and cyber security to the participants. This course develops a basic understanding of the algorithms used to protect users online and addresses some of the design choices behind these algorithms. One of the major focus in this course is to build a workable knowledge of mathematics used in cryptology and cyber security. The course emphasizes to provide a basic understanding of previous attacks on cryptosystems with the aim of preventing future attacks. A wide variety of basic network and cyber security protection techniques will be discussed involving infrastructure security in real world, protecting operating systems, defending against vulnerabilities and password protection.

What you will learn

Program Content

- Introduction to Classical Cryptography
- Block and Stream cipher
- Data Encryption Standard (DES) & Modes of operations
- Modes of Operations
- Advanced Encryption Standard (AES)
- Generic attacks on Symmetric Ciphers
- Introduction to Public Key Cryptography
- Key-exchange Protocols
- Secret Sharing
- Elliptic Curve ElGamal
- One-way Functions
- Hash Functions
- Digital Signatures
- Message Authentication Code
- Pseudorandom Generators
- Pretty Good Privacy
- Transport Level Security
- The Secure Socket Layer
- Wireless Network Security
- Electronic Mail System
- Key Distribution Approaches
- Infrastructure Security in Real World
- Protecting Operating Systems
- Defending Against Vulnerabilities
- Local Network Security
- Password Protection

Course Coordinator

Dr. Sourav Mukhopadhyay

Sourav Mukhopadhyay is an Associate Professor, Department of Mathematics at Indian Institute of Technology Kharagpur. He has completed his B.Sc (Honours in Mathematics) in 1997 from University of Calcutta, India. He has done M.Stat (in statistics) and M.Tech (in computer science) from Indian Statistical Institute, India, in 1999 and 2001 respectively. He worked with Cryptology Research Group at Indian Statistical Institute as a PhD student and received his Ph.D. degree in Computer Science from there in 2007. He was a Research Assistant at the Computer Science department of School of Computing, National University of Singapore (NUS). He visited Inria Rocquencourt, project CODES, France and worked as a post-doctoral research fellows at the School of Computer Engineering, Nanyang Technological University (NTU), Singapore. He was a post-doctoral research fellows and a part time Lecturer with School of Electronic Engineering, Dublin City University (DCU), Ireland.

About the Faculty

Dr. Ratna Dutta

Ratna Dutta is an Associate Professor, Department of Mathematics at Indian Institute of Technology Kharagpur. She worked with Cryptology Research Group at Indian Statistical Institute as a PhD student and received his Ph.D. degree in Computer Science from there in 2006. She worked as post-doctoral research fellow, Claude Shannon Institute, NUIM, Maynooth, Co. Kildare, Ireland and worked as research fellow, Institute for Infocomm Research, 21 Heng Mui Keng Terrace, Singapore. Her research interests include attribute based encryption, broadcast encryption, functional encryption, traitor tracing, witness encryption and lattice based cryptography.

Tentative lecturers from IIT Kharagpur and ISI Kolkata
